## What is autism?

Autism is a lifelong condition which affects the way a person communicates and relates to other people.

People with an Autism Spectrum Condition (ASC) have difficulty with everyday social interaction and can find it hard to make sense of the world around them.

Autism affects people in many different ways and the autistic spectrum ranges from low to high functioning autism and Asperger Syndrome. In diagnosis it is recognised that there are three areas where all people with autism have difficulties, irrespective of the degree of its effects, namely difficulties with **Social Interaction, Communication** (verbal and non-verbal) and **Imagination**. There are also issues around sensory differences and obsessional and ritualistic behaviours.

**It is estimated that in the UK autism, in all its forms, affects nearly one in 100 people.**

**This means about 600,000 in the whole of the country and almost 28,000 in Essex, Suffolk and Norfolk.**

## About Autism Anglia

Autism Anglia was formed following the merger of The Essex Autistic Society, Norfolk Autistic Society and the Norfolk Autistic Community Housing Association (NACHA) in 2008.

The charity is dedicated to promoting the welfare, education and care of children and adults with autism, whilst also supporting the many families affected by autism.

We have over 40 years' experience in providing a range of services aimed at enabling people with autism to live as independently as possible and to experience choice and inclusion in society.

We are an independent charity and therefore rely on fundraising to help us establish, maintain and expand our services.

## Our facilities

Norfolk Study Centre is situated in Dereham and is owned and run by Autism Anglia. All of our instructors are trained in the delivery of services to people affected by an ASC.

### We offer:

- An arts and crafts studio with textiles facilities.
- A PE department with large, modern gymnasium and access to many off-site facilities.
- An up-to-date and dynamic IT suite featuring business speed broadband.
- A life skills department with in-house provision for domestic skills aimed at promoting independent living.
- A horticulture department, including four allotments.

Other facilities on site include a sensory room and large dining room for break, lunch and recreation.

All Study Centre activities are tailored to the individual student and structured on a one instructor to two students (maximum) ratio, ensuring best possible quality of service.
