

Autism Anglia

Registered Charity No. 1063717

Factsheet – Supported Living

The Supported Living packages assist Service Users to reside in their own accommodation by providing individual hourly support that enables them to live as independently as possible.

The variety of needs and support an individual requires in the different areas of their life, such as accompanying them to activities of their choosing or assisting with day to day living experiences, are catered for through a care package designed around them. The service actively encourages participation in indoor and outdoor activities, further education, Autism Anglia Study Centres and other local facilities.

To ensure best practice the service is managed by a multi-disciplinary team with access to communication aids and sensory equipment which is reviewed and put into practice where needed. The team can also give advice and support to staff, parents and carers.

**If you would like to receive further information
